GenTech Soft is a startup company formed by former Bach Khoa University Engineers (Talent and PFIEV). Formed since 2022, the founders are PHD/Master researchers in famous universities in Singapore, Korea, Canada, Vietnam.

Now we are developing the Computer Vision products in DMS, retail, and ecommerce. Implement NLP Large Language models (gpt4all, LLama, H5,...) in big server A100 40GB, 80GB

Responsibilities

- Research and implement deep learning, AI machine learning models by guidance of PHD/Master leaders
- Deploy model and design APIs using FastAPI, Flash, ...
- Design databases with PostgreSQL, MySQL, mongo dB, ...
- Design basic frontend applications and websites.
- Data cleaning, labeling, data augmentation
- Follow scrum meeting, implement and report tasks from leaders

Requirements

- Having some experiences with Python (needed), OOP (needed)
- Good to have experiences with implementing machine learning algorithms (scikit-learn)/ deep learning models (Torch, TensorFlow)
- Active attitude, be proactive
- English: good for reading skill

Benefits

- Can become a fulltime Fresher/Junior Data Scientist in GenTech Soft with good salary after internship period
- Salary (negotiate – good to compare to the market)
- Flexible schedule, work from home environment
- Have chance to get offer to continue Master/PHD in Korea, Canada

This job is good for graduated students or undergraduate students with high passion in AI and Machine learning, follow data scientist career path. Please send your cv to GenTech Soft via contact@gentechsoft.com before 11/06/2023
